

ACS DIAGNOSTICS

Since 1981 we have manufactured outpatient cardiac monitoring devices.
Holters, Events, and Mobile Cardiac Telemetry are all we do.

1 The CORE12 device is designed to send LIVE patient ECG transmissions directly to our secured IDTF clinical laboratory for LIVE real time clinician review.

2 Our cardiac lab clinicians give LIVE analysis of all patient ECG transmissions, STAT, Daily and Full Disclosure report generation is available for physician review.

3 Clinicians can access reports and enroll patients all in one place through www.acsd4u.com.

“We have popularized Full Disclosure by exposing its necessity.” - LM

35+
Years

Over 3 Decades of Service

ACSD has over 35+ years serving cardiologists, internists, general practitioners and research facilities. As a USA medical equipment manufacturer, we are proud to produce “Quality Products for Those Who Care.”

Flexible Integration Design

Our seamless data transfer makes uploading and downloading reports a snap. We are committed to designing and manufacturing high quality, reliable instrumentation backed by the best support in the industry.

HIPAA-Compliant Software

ACSD is the diagnostic laboratory for all outpatient cardiac monitoring, Holter, Event and Mobile Cardiac Telemetry (MCT) Monitoring. Like our existing cardiac instrumentation.

24/7

Continual Lab Analysis

ACSD provides 24 / 7/ 365 per day patient monitoring that physicians can trust. Our prompt data processing and our seamless transfer system makes outsourcing your cardiac monitoring simple.
